An investment in Golden Crypto Dog project any of its affiliates or other investment vehicles intended to invest in Golden Crypto Dog project entails a high degree of risk, and no assurance can be given that such entity's investment objective will be achieved or that investors will receive a return of their capital. In considering the projected performance information contained herein, you should bear in mind that past or projected performance is not necessarily indicative of future results, and there can be no assurance that any investment vehicle will achieve comparable results or be able to implement its investment strategy or achieve its investment objectives. You should not rely on Golden Crypto Dog project past experience or view of broad market in making any investment or other decisions related to Golden Crypto Dog project and related entities.

This presentation shall not constitute or form part of an offer to sell or the solicitation of an offer to buy any securities of the Company, nor shall there be any sale of any securities of the Company in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction.

Introduction

Running on the Solana Blockchain, \$GCD is a meme coin that allows holders to access the Golden Crypto Dog Run Web3 meme Game. For the avoidance of doubt, \$GCD is not tied to any underlying form of value and has no utility. Players can access the game using their Web3 digital access wallet, which is similar to a user password.

Once inside the game, players can obtain additional \$GCD tokens via play-to-earn mechanisms on the Golden Crypto Dog Run Web3 Game. These tokens can be exchanged for in-game purchases of items with no underlying value other than the \$GCD tokens exchanged.

Project Vision and Goals

Meme tokens are exploding in popularity. However, they are practically useless, making them speculative price fluctuation tools. The \$GCD project aims to gamify the meme coin experience, increase the use of Web3 games on the Solana blockchain, and create social impact by donating a portion of the token raise proceeds to the American Society For the Prevention of Cruelty to Animals (ASPCA) or some similar animal welfare charity with a focus on preventative care treatment.

Why Solana

Solana is one of the fastest blockchains globally, processing approximately 2500 transactions per second. The user must pay a minimum gas fee to process a transaction on a blockchain platform. This fee varies from blockchain to blockchain; some require a high gas fee. In this regard, Solana is one of the lowest-cost blockchains in terms of its gas fee, which is approximately \$0.00025. Solana is user-friendly with ready-made tools and has an easy smart contract deployment process. It can exponentially host multiple decentralized applications on its platform.

Golden Crypto Dog Run Game

Golden Crypto Dog Run is a retro-80s-inspired web3 game that allows players to test their skills and collect rewards.

What Makes Golden Crypto Dog Run Game Unique

The Golden Crypto Dog Run game sets itself apart from traditional meme coins and utility tokens by integrating a play-to-earn gaming model directly tied to a blockchain-based ecosystem. Unlike typical meme coins that often lack intrinsic utility and are driven mainly by speculative interest, \$GCD tokens are used within an engaging game environment, where players can earn tokens through gameplay, contributing to a self-sustaining economy.

Additionally, the game promotes social impact through charitable donations to animal welfare, bridging the gap between digital entertainment and real-world benefits. This dual focus on interactive gaming and philanthropy creates a unique value proposition beyond the typical use cases of other cryptocurrencies.

First 10,000 Players

The first 10,000 players who successfully onboard by connecting their Web3 wallets will be awarded \$GCD tokens at random intervals. Players are automatically entered into a \$GCD token reward draw upon successfully integrating their Web3 wallet. Every new player within the first 10,000 has an equal chance to win from any tier, meaning winners will be randomly assigned a tier. A maximum total of 990,000,000 tokens will be allocated to these first 10,000 participants. Eligibility is limited to 10,000 participants. Each web3 wallet address shall have one chance to win.

Winner Tier	% of Total	# of \$GCD Each	# of Winners	Total \$GCD Awarded	Probability
Tier 1	4%	3,960,000	10	39,600,000	0.001
Tier 2	8%	1,584,000	50	79,200,000	0.005
Tier 3	16%	1,056,000	150	158,400,000	0.015
Tier 4	40%	396,000	1000	396,000,000	0.100
Base Reward	32%	36,041	8,790	316,800,000	0.879
Total	100%		10,000	990,000,000	1

Next 50,000 Players

The next 50,000 players (after the first 10,000) who successfully onboard by connecting their Web3 wallet will be awarded \$GCD tokens at random intervals. Players are automatically entered into a \$GCD token reward draw upon successfully integrating their Web3 wallet. Every new player within the next 50,000 has an equal chance to win from any tier, meaning winners will be randomly assigned a tier. A maximum total of 990,000,000 tokens will be allocated to these participants. Eligibility is limited to 50,000 participants. Each web3 wallet address shall have one chance to win.

Winner Tier	% of Total	# of \$GCD Each	# of Winners	Total \$GCD Awarded	Probability
Tier 1	4%	792,000	50	39,600,000	0.001
Tier 2	8%	316,800	250	79,200,000	0.005
Tier 3	16%	211,200	750	158,400,000	0.015
Tier 4	40%	79,200	5000	396,000,000	0.100
Base Reward	32%	7,208	43950	316,800,000	0.879
Total	100%		50,000	990,000,000	1

Airdrop Tokens

The project will airdrop Approximately 4,950,000,000 \$GCD tokens into wallets containing Dog-run-compatible tokens. Dog-run-compatible tokens will include Solana meme Tokens and select ERC meme Tokens, such as DOGE, SHIB, FLOKI, and BABYDOGE. Prior to the \$GCD airdrop, our community management team will poll community members to vote on the tokens selected.

Game Overview

Test your skills and collect rewards in Golden Crypto Dog Run, an 80s-style action-adventure gaming experience that enables you to earn while you play. Players accumulate \$GCD points by completing various tasks, which can be exchanged for in-game assets while navigating the adventurous world of “Golden,” a token-obsessed meme dog.

Golden is a rescue dog saved from the brink of death by his owner. After extensive treatments, he recovered and dedicated his life to helping other sick dogs. Along the way, Golden meets other characters to help him collect items such as medication, bones, and eye drops. Unfortunately, Golden gets sidetracked by the glamorous lifestyle and influence of the characters of meme town. At key points, Golden must choose whether to donate his assets for social good or to spend on lavish bling items.

Game Economy

Golden Crypto Dog Run’s economy is based on a range of assets and items that serve as the building blocks of an immersive learning environment that provides social impact.

At the core of this experience lies a robust tokenomic structure centered around \$GCD, which interconnects all of these assets through our marketplace.

There are two types of assets in the ecosystem:

1. Standard assets are off-chain and can't be traded.
2. Prime assets are on-chain and can be traded. All NFT assets can be purchased via SOL or \$GCD.

Exchange ratios are subject to change based on market conditions and special offers.

In Game 100 to 300-meter dash & obstacle course (Game Farming)

While playing the game, an in-game 100-meter and 300-meter dash experience appears randomly. Players enter the game by clicking on the indicator that the game is available. Golden enters a challenge with a cheering crowd of meme characters (imagine Pepe and others). At the end of the race, players are offered a special NFT offer to acquire new bling with the winnings. The “Game Farming” allocation will be supplied via the Ecosystem Development pool.

Ecosystem Assets¹

¹ This schedule is preliminary and must be modeled in detail to optimize gaming experience.

Item	Category	Purpose	Exchange Ratio (\$GCD)
Snack	Standard	Heals Damage 5%	Find
Eye Drops	Standard	Heals Damage 15%	15
Shots	Standard	Heals Damage 50%	50
Bone	Standard	Increase Life +1	Find
Squeeze Toy	Prime	Entertainment	3
Sunglasses	Prime	Bling	10
Dog Collar	Prime	Bling	25
Diamond	Prime	Bling	500
Lambo	Prime	Bling	1,000
Private Jet	Prime	Bling	2,500
Yacht	Prime	Bling	5,000
Rocket	Prime	Bling	10,000
Level Card	Prime	Level Up	See Schedule
Gem Mining Tool	Prime	Increase earning 2x	Rare Find
Radar	Prime	Finding Items Easier (time)	Rare Find
Magical Bag	Prime	3x on items collected (time)	Rare Find

Level Card NFTs

Players possessing level NFTs have increasing opportunities to acquire in-game items and find rare artifacts.

Players level up according to how many lives are collected. Each life represents a dog life that Golden has saved.

- » Levels 1 - 10 Increase with every 5 lives collected;
- » levels 11 - 20 increase with every 10 lives collected;
- » levels 21 - 30 increase with every 20 lives collected;
- » levels 31 - 40 increase with every 30 lives collected;
- » levels 41 - 50 increase with every 40 lives collected;

Players can purchase “Level-up Cards” according to the following schedule.²

- » level 5: 1 SOL or equivalent in \$GCD;
- » level 10: 3 SOL or equivalent in \$GCD;
- » level 20: 10 SOL or equivalent in \$GCD;
- » level 50: 500 SOL or equivalent in \$GCD;

² This schedule is preliminary and must be modeled in detail to optimize gaming experience.

Tokenomics

A total of 99 billion GCD will be issued. They will be distributed to 9 main pools with different un-locking schedules.

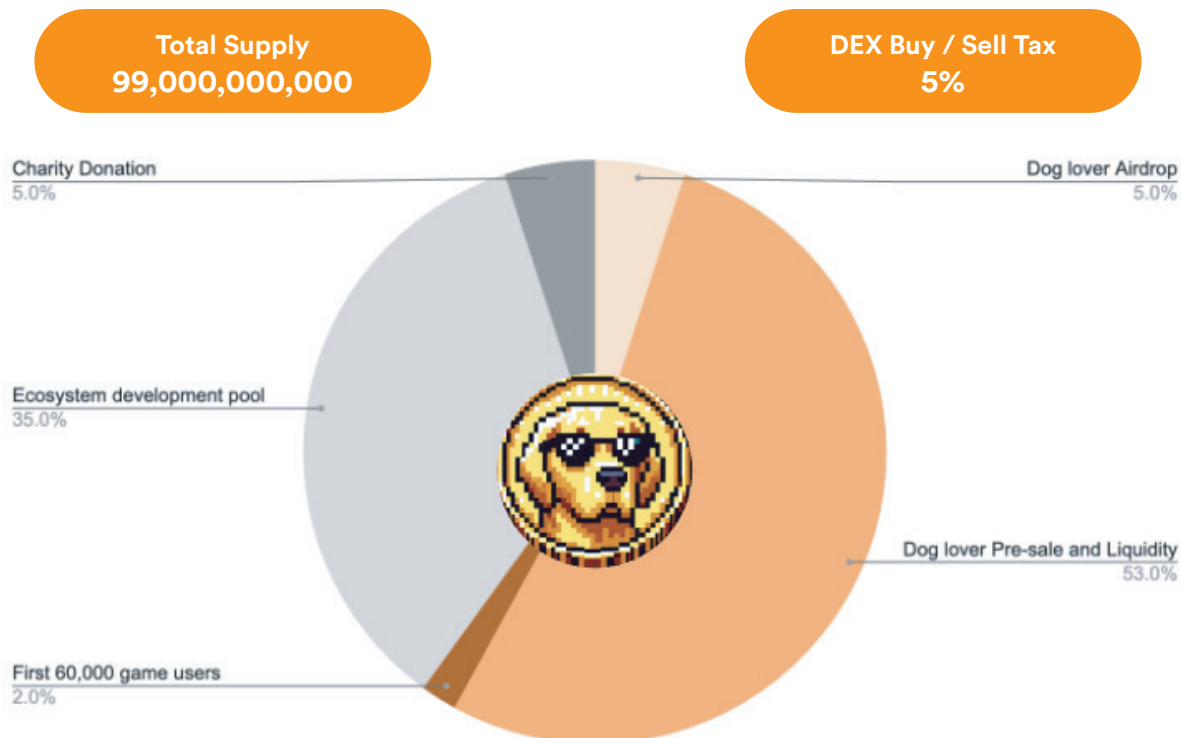

The token distribution will be as follows:

1. Charity Donation: 5%
2. Dog lover Airdrop: 5%
3. Ecosystem development: 35%
4. Dog lover Pre-Sale and LP: 53% (More details coming soon)
5. First 60,000 Game players: 2%

Transaction and Transfer Fees

There will be a 5% transfer fee for moving \$GCD in and out of the ecosystem. Half of the fee will be allocated towards Infrastructure and the other half (50%) will be allocated to Community Development Projects. There will also be a 5% fee for any in-ecosystem exchanges, which is the same distribution noted above.³

³ Off-ecosystem wallets shall be defined as any wallet not controlled by GCD or its affiliates.

Social Impact

Nearly 4 million dogs will enter one of over 13,000 animal shelters annually in the United States. Our team members have direct experience adopting dogs that were abandoned due to health issues. Pet abandonment is a serious issue that can't be dealt with by donating to shelters. Addressing this problem requires getting to the root cause.

Several factors contribute to pet abandonment, including high costs of veterinary treatment for serious issues, demographic disparities, lack of awareness of affordable alternatives, and educational gaps. Cost is the largest barrier to veterinary care. Unfortunately, most pet owners lack information about the long-term benefits of routine veterinarian visits and access to affordable veterinary care facilities.

Routine veterinary visits prevent, diagnose, and treat pet problems or diseases. Additionally, a significant correlation exists between demographic disparity and the availability of affordable care options. Typical barriers include cost of care, transportation, hours of operation, language differences, poor previous encounters with veterinarians, lack of trust in veterinarians, dog owners providing healthcare for their dogs themselves, and/or dog owners not believing veterinary care is necessary.

Our team is committed to working towards a solution that helps educate pet owners on the importance of routine visits to the veterinarian, the availability of affordable care options, and the demographic barriers that affect the lives of pets and their owners. That's why we intend to donate 5% of token sale proceeds to charitable organizations such as the ASPCA that address this issue.

Key Milestones and Launch Schedule

The project has outlined a timeline of milestones leading up to key deliverables.

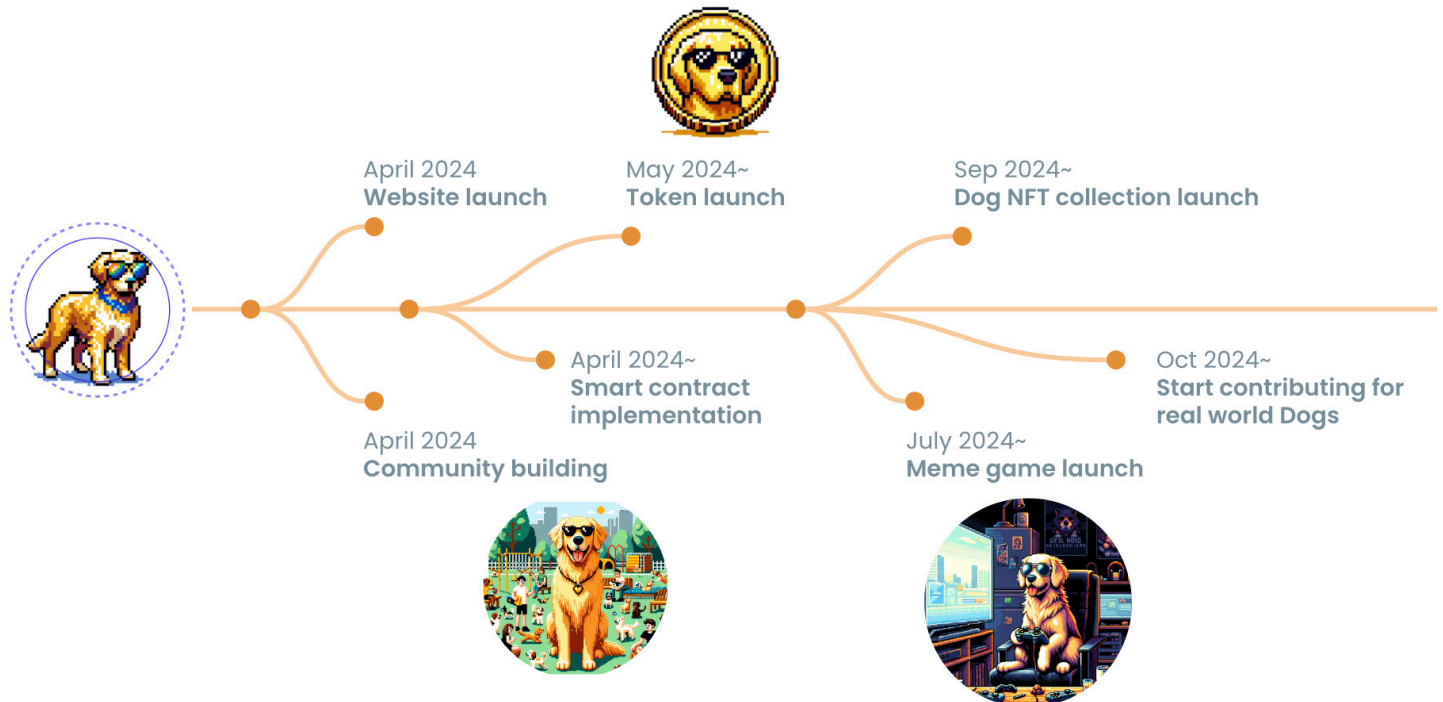

April 2024: The first milestone is to kick off community building, creating a solid base of interested and engaged supporters. In this phase, the project's website goes live, Telegram becomes active, and other social platforms are launched. The technical team will implement the smart contract on Solana to manage secure token functionality and distribution mechanisms.

May 2024: The project launches on Binance and other platforms, allowing non-presale token holders to trade and exchange in preparation for future in-game features within the future \$GCD ecosystem.

July 2024: Launch of the \$GCD meme game, with preliminary features including a signup game for the first 60,000 players, initial levels, and limited assets.

September 2024: The NFT collection adds a layer of ownership, allowing players to possess verifiable, limited-edition digital assets.

October 2024: The project takes on a social cause, contributing to charities that provide affordable preventative care and education.

*Thank You
Fur-iends*
